What would you consider to be a swimming area in your community?

What factors should be considered when protecting those areas?

Would you support an initiative by DHEC to prioritize our state's waterways and apply different standards depending on how the water is used? (please explain)

Do you support DHEC's investigation into possibly switching to other more specific indicators of recreational water quality? (please explain)

Do you support increased funding and/or enforcement authority for DHEC to improve our state's waters? (please explain)
